DETAILED ACTION

This office action corresponds to application 10/824,449 filed 4/14/2004. Claims 1-35 are pending in this application.

The inventions are distinct, each from the other because of the following reasons:

Election/Restrictions

I. Claims 1-34 are drawn to discovering pertinent inputs in a repository and is classified in class 707 subclass 3.

II. Claim 35 is drawn to project management, classified in class 717 subclass 101.

Inventions in Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the invention in Group I has separate utility such as discovering pertinent inputs in a repository. The invention in Group II has a separate utility such as project management.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper:

During a telephone conversation with Robert McLauchlan on 10/12/2006 a written election restriction requirement had been requested.

Art Unit: 2167

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17(i).
